

The Thruput GFVT03-TS touch screen is a direct Form, Fit & Function replacement for the legacy sonic digitizers and touch screens used with the Sony DDM-2800 series of monitors.

The touch screen output is configurable and reports touch inputs from finger or thin gloves using the existing data format of the customers computer systems.

- Plug and play replacement
- Smooth touch performance
- Easy-to-clean, no wear surface
- Anti-glare for office-environment applications
- Configurable data I/O. Current legacy formats include: GP9, RS232 and HID

Specification

Technology	PCT, multi-touch
Communications	USB (HID) Client I/O RS232 (custom) Function panel (custom)
Touch Inputs	10
Input Method	Finger or thin gloves
Accuracy	4 points/mm
Sample Rate	100 samples/sec
Linearization	Inherently Linear
Light Transmission	> 85%
Surface Obstruction	Glass
