## 75" IP65 Outdoor High Brightness Android Network Digital Signage

Right Message At Right Time

Digital Signage is the remote-controlled distribution and playback of digital content (TV programs, advertising, menus, and every sort of information) on networks of displays. These displays can range from digital billboards to much smaller screens, either at a single location or across multiple sites. It's all about targeting the audience with relevant information. Digital signage enables users to display their messages more dynamically and targeted.

We have demonstrated a Digital Signage application on android platform. The application provides the features of updating the content from remote web browser, playback of video content, image, HTML web pages and scrolling text messages.

### Key Features:

- Android 4.4 operating system
- Rockchip RK3188 Quad Core CPU
- 1/2GB DDR3 + 8/16GB Flash
- Anti-ultraviolet and heat insulation
- Intelligent wind control system
- High temperature protection system
- Low temperature protection
- Full waterproof system
- Air inlet and outlet dust-proof
- AG glass anti-reflecture film
- IP65 Enclosure
- Three Frames and three heat insulations
- Intelligent electric leakage protection
- Air conditioner for cooling and heating

### Designed for:

- POS
- Hotel
- Self-service Terminal
- Public Information Display
- Hospitality
- In-vehicles And Transportation
